Weather Key Points

Regional Operations Center

Western Region

Friday, February 10

- Areas of dense fog will persist across parts of the Central Valley through late Friday morning
- Gusty Santa Ana winds will also redevelop across the wind-prone areas of southern California through Friday afternoon, with east to northeast winds gusting 40 to locally 50 mph
- A slow-moving but fairly weak weather system will spread light rain and mountain snow across much of the state beginning Friday over northern California, gradually working into southern California Saturday afternoon through Sunday evening
 - No widespread weather impacts are expected with this precipitation, though some local travel impacts are possible over the Sierra, mainly above 4,000-4,500 feet late Friday and Saturday
 - Breezy winds of 25-35 mph are also expected across the Sierra, Sacramento Valley, coastal northern California, and much of southern California Saturday afternoon into Sunday
- Another storm could bring gusty winds with rain and mountain snow to portions of the state for the early to middle portions of next week
 - Areas of gusty winds of 45-50 mph are expected Monday and Tuesday with this storm along the northern coast.
 - Much colder temperatures are expected mid to late week

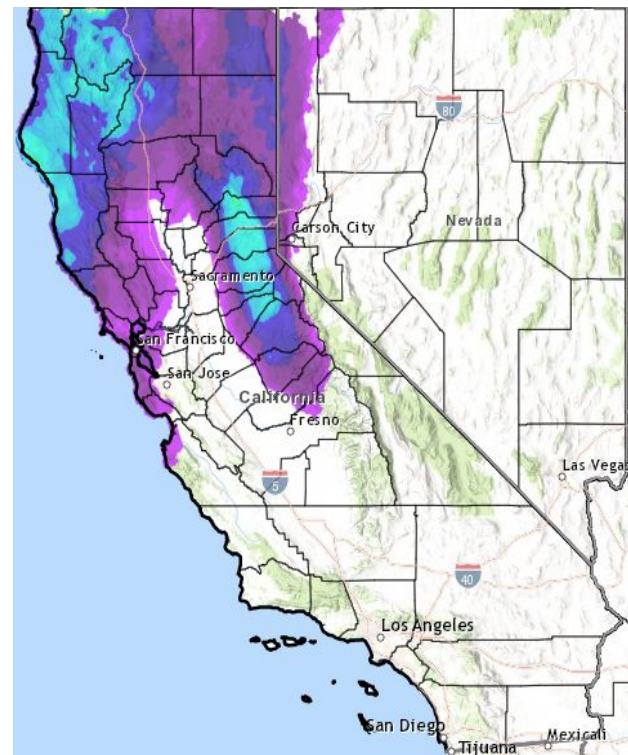

Daily Precipitation Forecast

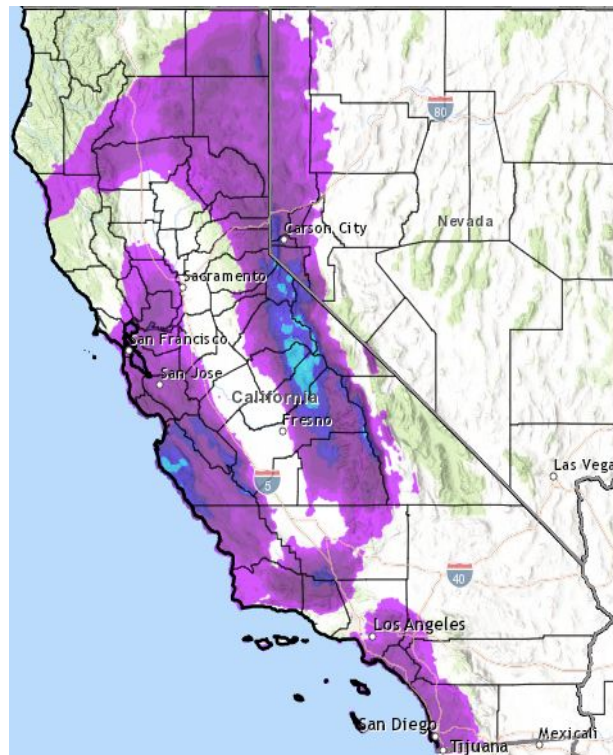

Regional Operations Center

Western Region

Friday, February 10

Friday

Saturday

Sunday

Important Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms will produce locally much higher rainfall amounts.

Precipitation (inches)

Weather Outlook (6-14 Days)

Regional Operations Center

Western Region

Friday, February 10

6-10 Day Outlook (February 15 - February 19)

Temperatures

- Below normal temperatures are strongly favored statewide

Precipitation

- Above normal precipitation is favored statewide

8-14 Day Outlook (February 17 - February 23)

Temperatures

- Below normal temperatures are again strongly favored statewide

Precipitation

- Above normal precipitation is favored across much of the state, with near normal precipitation favored along the northern coast

Impact Level Definition

1. **Impactful weather is not expected.**
2. **Potential threat to lives and property if no/incorrect actions are taken.**
 - a. Localized impacts on commerce possible.
 - b. Includes events that occur frequently.
3. **Potential threat to lives and property if no/incorrect actions are taken.**
 - a. Impacts on commerce possible.
 - b. Includes events that occur a few times per year.
4. **Actions likely needed to save lives and/or property.**
 - a. Significant impacts to commerce possible.
 - b. Includes events that occur infrequently.
5. **Actions required to save lives and/or property.**
 - a. Significant and extended impacts to commerce.
 - b. Includes exceptionally rare events.
